

Is your well water safe to drink?

Test for common contaminants in
Stearns County groundwater.

2 in 5

private wells in
Stearns county
have arsenic

1 in 10

private wells in some
Stearns townships have
unsafe levels of nitrate

You cannot see, taste, or
smell most contaminants.

Some contaminants can
cause immediate and
long-term health effects.

\$10*

is all it costs to get a sample kit to test your water for coliform bacteria, nitrate, and arsenic at the clinics below. The \$10 deal will be offered to the first 150 households to participate in each of the clinics. Additional households can pay \$45 for the same tests. Choose the best date, time, and location for you. **Bring cash or check.**
